IUA Spring Conference

20 May 2002

Thistle Marble Arch, London

The IUA Spring Conference

After the huge success of Ingres World 2001, it's time for the IUA Spring Conference !

The conference will have a similar format to last year's successful one day IUA event, with a single keynote speaker from Computer Associates to let us all into the latest news. These have been popular presentations with the IUA in the past, noted for enthusiastic and informative sessions about Ingres and its future direction. The conference will also have a series of parallel streams running throughout the day as follows:

Stream 1 - focussing on The Server (Ingres 2.6 and beyond)
Stream 2 - focussing on OpenROAD
Stream 3 - focussing on Application Development

There will also be the usual chance to put your questions to CA managers at the Executive Q&A session.

Thanks to CA's generous sponsorship of the conference, the cost of attending remains excellent value at £175 plus VAT per delegate.

Throughout the Day The Technical Camp, Exhibition & Exhibition Stream

The Technical Camp offers you the chance to meet Ingres support specialists and talk one to one about those undocumented tips and features.

The exhibition is available throughout the conference demonstrating Ingres related products and services.

Sponsorship and Exhibition Opportunities

The Ingres Users Association is growing each year in both size and reputation. At each conference we offer tailor-made sponsorship opportunities including the chance to sponsor the Delegate Pack, place a flyer into the pack or have an Exhibition stand. Call The Ultimate Event Company on 01932 592041 for further details and assistance.

COMPETITION - Book early to enter

There will be a prize draw at the end of the conference - those who have registered for the IUA Conference by 19 April 2002 will get the chance to win a raffle prize.

Conference Agenda

The day begins at 8.30am with registration and coffee, followed by a welcome from Phil Parkin, the IUA Chairman, at 9.30am. The conference will continue as follows:
